DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 14-15, filed 4 December 2006, with respect to claims 1-3, 11-13, 18-33, 28-38 have been fully considered and are persuasive. The rejection under 35 USC§102(b) of these claims *supra* has been withdrawn.
2. Applicant's arguments filed 4 December 2006 have been fully considered but they are not persuasive. See below.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 44-48 rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for metal silicate absorbent based on the weight percent of the hydroxylalkyl amide composition, does not reasonably provide enablement for the metal silicate absorbent based on the weight percent of the reaction mixture as a whole. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. There is no indication the ratios given in the specification on page 11, lines 5-9 are applicable the reaction mixture as a whole. The addition of the metal silicate comes after the

Art Unit: 1621

organic phase containing the hydroxylalkyl amide as disclosed on page 9, lines 4-5. The reaction mixture contains unreacted alkanolamine, esters and optionally an catalyst therefore the ratios given for the hydroxylalkyl amide would not apply to the reaction mixture and is therefore not enabled for the instant claims as written.

This also applies to the addition of the filter aid and its percentages that are based on the hydroxylalkyl amide and not the reaction mixture as a whole.

The amending of the specification to support claims 44-48 as originally filed was not submitted with the instant response. Therefore the rejection is being maintained.

Allowable Subject Matter

5. Claims 1-43, 49-64, 68-78 are allowed.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee

Art Unit: 1621

pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action.

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
